

Paisajes soñados

La Real Academia de Bellas Artes de San Fernando, de Madrid, ha exhibido hasta finales del pasado enero las obras de los pintores finalistas del XII Premio BMW de pintura, entre los que se encontraba **Guillermo Serrano de Entrambasaguas**. El

artista madrileño se ha consagrado por su personal visión de los paisajes, obtenidos de la realidad, pero próximos a lo imaginativo. Son paisajes soñados que, no obstante, presentan lugares concretos, pueblos, praderas o ríos, más presentidos que reales. ■

Dream landscapes

Madrid's Royal Academy of Fine Arts held an exhibition until the end of January showing the works of the finalists in the 12th BMW Prize contest for paintings. Included in this group was **Guillermo Serrano de Entrambasaguas**, the Madrid artist who has become famous for his personal view of landscapes, obtained from real scenes but closer to the imaginative. His landscapes are dreamlike and, although they depict actual places, towns, meadows and rivers, are more sensed than real. ■
